I didn't expect our
first episode to be
this big.

Thank you for showing up.

HI, I'M

Puru
Tuladhar.

15+ years using Linux.

Cloud Infrastructure Engineer
Kubestronaut & Author
Linux tinkerer.

Today: no Kubernetes.
Just Linux on the desktop.

SPACE

Everything begins here.

Dwindle tiling: every window gets a place. Nothing hides behind anything else.

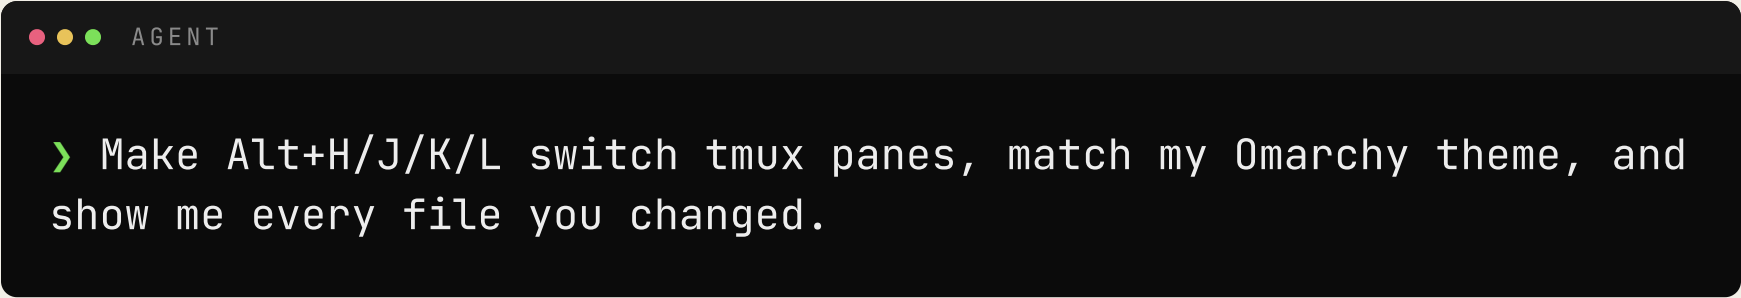

One screen. Many contexts.

“The malleable OS for the age of agents.”

— OMARCHY

MALLEABLE Shape the system to your taste—then let an agent help make it real.

A terminal window with a dark background and a title bar containing three colored dots (red, yellow, green) and the text "AGENT". The terminal displays a green prompt character followed by a text instruction.

AGENT

> Make Alt+H/J/K/L switch tmux panes, match my Omarchy theme, and show me every file you changed.

Configuration is becoming a conversation.

THANK YOU.
